

Place Settings Floor Planner Common Functions

Working with Symbols & Products

- Changing the Colour

Select the item and click 'i' to expand the info palette and choose a colour with the colour tool

- Rotating

Select the item and click 'i' to expand the info palette, and enter a degree of rotation

- Cloning

Select the item, and click clone on the mini info palette

- Scale Symbols

Click the symbol and drag it from the scale corner. Please note that products cannot be scaled.

- Group Symbols

Ensure show all tools is selected. Shift+click symbols you want to group and select Group from the Edit menu

- Align

To align items, draw a reference line with the line tool, and use it to align items. Make use of the group and clone commands for multiple symbols or products.

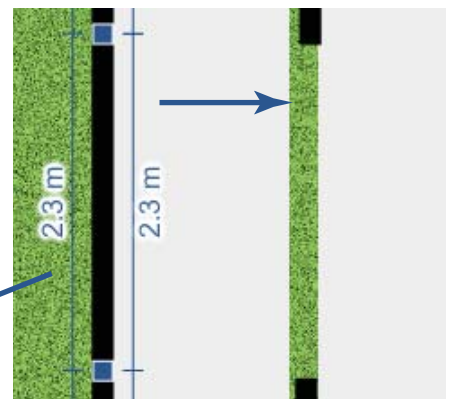

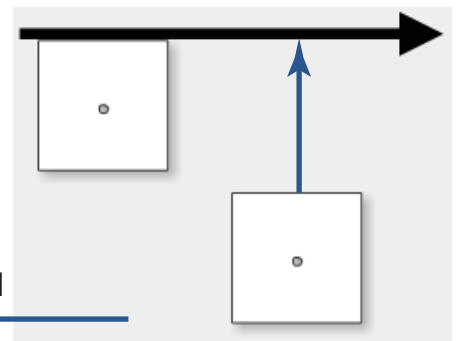

- Table & Chair Clusters

Table & Chair clusters are found in the Symbols menu.

Working with Structures

-Splitting Walls

Ctrl+Click any wall to insert a break which can be dragged to exact dimensions. Insert another break and delete a segment for doorways

- Custom Surfaces/Walls

Using the wall or surface tool, you can draw custom shapes by clicking from point to point.

Measurements

- Use the measurement tool to measure point to point distances
